

FLAIRMO ACT 240 – CARBON TOWER

The FLAIRMO ACT 240 is a optimal oil vapor filtration. The high efficiency activated carbon towers are capable of removing hydrocarbons, odours and oil vapor from compressed air. They will, by the use of adsorption, reduce the residual oil content to lower than 0.003 mg/m³. The pressure drop is low and stays minimal during the filter's lifetime.

Specifications

Maximum Flow Rate	240 l/min @ 7 Bar
Operating Pressure	1 - 10 Bar
Operating Temperature	5 - 50 °C
Min. Service Interval	12 Months / 4000 Hours
Connection	3/8 BSPP / On request
LxWxH	108 x 110 x 1550 mm
Weight	15 kg
Inlet Air Quality	Air Dryer & 0,01µ Filter

- Maximum oil vapor removal by special activated carbon material.
- Low pressure drop by optimal internal flow path.
- Robust and compact design
- Simple and low-cost service exchange program
